NEON-X

TRADE & PLAY HYBRID

PROJECT VISION

NEON-X is a next-generation conceptual platform designed to bridge the gap between decentralised high-frequency trading and high-fidelity gaming environments. The interface leverages a "Cyber-Noir" aesthetic to provide users with a high-stakes, immersive experience.

CORE MODULES

📉 Trade Terminal

Real-time asset monitoring and execution. The terminal provides a streamlined interface for rapid market interaction.

- Live Price Fluctuations
- Instant Buy/Sell Execution
- Wallet Balance Integration

🎮 Gaming Vault

A curated portal to high-performance gaming missions using the "Realistic Engine 2.0" framework.

- Velocity 8: Ion Drift
- Neon Protocol: Zero Hour
- Ray-tracing enabled UI

TECHNICAL SPECIFICATIONS

Frontend Framework	Modern HTML5 / CSS3 / Vanilla JavaScript
Style Identity	Neon Cyberpunk (Fluorescent Accents on Obsidian)
Design Tone	High-contrast, immersive, interactive
